

OSCOMMERCE BANK PAYMENT MODULE FOR ARUBA BANK TRANSFER / DEPOSIT

Sunday, September 28, 2008
7:13 PM

This Project must conform with all standards of PHP Coding and with all standards of OSCOMMERCE contributions.

osCommerce Online Merchant Administration Tool
<http://www.primaaruba.com/admin/modules.php?set=payment&module=banktransfer&action=edit>
 Screen clipping taken: 28/Sep/2008, 7:40 PM

The code must be fast and well commented with installation and un-installation script.
 I looked at the following script on the OSCOMMERCE website and would like to use it as inspiration.

<http://addons.oscommerce.com/info/5035>

Upon installation it must create the following tables (and off course remove them when module is uninstalled) below is just a mockup of the admin area and the features it should have:

Aruba Bank Transfer Payment

Allow (checking to allow Bank transfer yes or no)

Bank Name:

Bank Logo: (Path to *.gif image to upload, it could then be displayed in the user area as a thumbnail)

Beneficiary:

Account Number: (Account numbers in Aruba can be quite long allow for alpha numeric with 12 digits no need to mask)

Account Currency:

Account Type: (choice between SAVINGS or CURRENT, this can be hardcoded)

Instructions: (Path to image to upload, it could then be displayed in the user area as a popup link)

ZONE (there should be an option to only allow this payment module for the Country's selected up to you how to implement it check the contributions for info, the country must be set by the admin and not hardcoded)

BANK NAME	BENEFICIARY	ACCOUNT NUMBER	ACCOUNT TYPE	ACCOUNT CURRENCY	
Acme Bank	Wiley Coyote	12345678	SAVINGS	AWG	<input type="button" value="EDIT"/> <input type="button" value="DELETE"/>
Disney Bank	Mini Mouse	87654321	CURRENT	USS	<input type="button" value="EDIT"/> <input type="button" value="DELETE"/>

Screen clipping taken: 28/Sep/2008, 8:10 PM

Then on the user side it should display like this (again just an example feel free to streamline)

Please use the below details to transfer your total order value

Bank Name: Aruba Bank N.V.

 <----- Logo thumbnail

Beneficiary: Samuel Kemp
 Account Number: 12345678
 Account Currency: AWG

Your order id: OSCOMMERCE_ORDER_ID
Important: To expedite your order please put this in the reason field.

[instructions](#) <----(popup link to the instructions image it can also be a page suggestions?)

Screen clipping taken: 28/Sep/2008, 8:23 PM

It should fit in nice with the current template
Like this (or better)

ORDER CONFIRMATION

Delivery Address (Edit)	Products (Edit) 1 xPattern Dress Not In Stock	\$40.00
Shipping Method (Edit) Flat Rate (Best Way)

Thank you for your attention, I hope this clarified the job, I will be reviewing your bids in a few days
Please do give me samples if you have done other work with os commerce I am interested in a long term project partner.
